"The Fountain
of Youth"

Did You Know?

Hyaluronic Acid (HA) has been reported to:

- ▶ relieve pain and stiffness in arthritic joints
- ▶ lessen the effects of menopause
- ▶ cause youthful changes in the skin
- ▶ relieve pain and stiffness in arthritic joints
- ▶ have a profound effect on vision
- ▶ present a promising approach to cancer therapy and prevention

The loss of HA is believed to bring about many of the gradual aging changes in the human body.

Enjoy your favorite activities again

Age can be cruel to our bodies, but now with Essential Renewal with HA Joint Solutions we can fight back. One important reason why our skin loses its luster and our joints begin to ache is because of the depletion of hyaluronic acid (HA) in our bodies.

As we age, we lose this valuable substance and without nutritional supplements, we are never able to replenish hyaluronic acid (HA) to the level we once had. Hyaluronic Acid (HA) is a nutrient found in our bodies that functions by binding collagen, lubricating and adding cushion between joints.*

The new improved Joint Solutions formula may assist with:

- aging joints*
- joint discomfort*
- inflammation*
- synovial (joint) fluid*
- cartilage synthesis in the joints*
- collagen production*
- joint movement and flexibility*
